PROFILE

Computer Science undergraduate (University of Bedfordshire, UK) who designs, builds, and ships full-stack web applications, desktop systems, and RESTful APIs across the complete development lifecycle. Actively seeking an entry-level role in App Development, Web Development, UI/UX, Data Analysis, or AI Engineering.

PROJECTS

Full-Stack E-Commerce Web Application

- Engineered a full-stack e-commerce platform with product browsing, cart management, secure checkout, and session-based authentication — eliminating manual order handling for the client.
- Architected a dual-role dashboard system (user + admin) enabling real-time inventory tracking, order processing, and product lifecycle management.

Tech Stack: PHP · MySQL · JavaScript · HTML · CSS

Patient Management System - Desktop Application

- Designed and delivered a Java Swing desktop application that automated patient registration, scheduling, and record retrieval for a healthcare provider - replacing a manual paper-based workflow.

Tech Stack: Java · Object-Oriented Programming (OOP)

Responsive Web Application - NDIR Data System

- Built a full-stack data portal with a RESTful Node.js backend, AJAX-driven async requests, and structured form validation.
- Designed a MongoDB schema optimised for flexible document storage.

Tech Stack: MongoDB · REST APIs · AJAX · Node.js · JSON · HTML · Bootstrap (Framework) · JQuery
